

# Bob Tianqi Wei

San Francisco, CA | [bobtianqiwei@berkeley.edu](mailto:bobtianqiwei@berkeley.edu) | 510-816-2381 | [bobtianqiwei.com](http://bobtianqiwei.com) | [github.com/bobtianqiwei](https://github.com/bobtianqiwei)

## Education

**University of California at Berkeley, College of Engineering**

M.Des in Human-Computer Interaction

Aug 2023 – Dec 2024

Distinguished Scholar, 3.66/4

**Tsinghua University, Academy of Arts and Design**

B.A. in Industrial and Product Design

Aug 2019 – Jun 2023

3.71/4

## Technical Experiences

**Design Engineer, eTopus Technology Inc.** San Jose, CA

Oct 2025 – Present

- Owned UI/UX and frontend delivery for OpSyn, an internal enterprise AI agent, translating Figma design into pixel-accurate production React+Vite UI with responsive layouts, reusable components and consistent typography and spacing
- Implemented core chat workflows including streaming responses, file uploads, session sharing and feedback modals
- Built agent trace and citation UX with a source list and inline highlights that surfaces referenced documents and quotes; shipped a feedback loop and fixed API integration to persist feedback and reflect submission state in UI
- Designed and shipped hierarchical KPI and robotics debug dashboards, defining navigation and page layouts from high level overviews to drill down views

**Frontend Engineer, Create, Inc.** Contract, San Francisco, CA

Jul 2025 - Sep 2025

- Shipped high-fidelity marketing sites supporting the launch of *Anything*, Create's new AI app builder, collaborating closely with design and founding team: [Site](#), [Affiliate Program](#), [Brand Resources](#)
- Converted Figma specs into pixel-accurate, responsive React UI with TypeScript; established reusable components, fluid spacing/typography, and design token aligned styling for multi breakpoint layouts
- Refined internal AI agent pipelines for *Anything*, designing prompts that translate user-submitted images into code
- Contributed to QA of an unreleased product line, focusing on UI quality and UX consistency
- Helped the launch story and site quality that supported revenue growth to \$1M ARR in Q3 2025.

**Research Engineer, Berkeley Institute of Design Lab, UC Berkeley EECS, Part-Time**

Nov 2023 - Present

- Developed [ArtiFactor](#), an AI-powered creative workflow platform integrating multi-agent orchestration, LLMs, and multimodal ML models to support intelligent content generation and analysis
- Designed a semantic knowledge base system with vector embeddings. Architected full-stack systems using React, Node.js, and Python Flask microservices, with real-time agent triggering, workflow automation, and Dockerized ML backends
- Collaborated with designers, engineers and researchers to bridge AI/ML capabilities with intuitive UX

## Projects

**PartSelect Chat Agent - AI Agent for E-Commerce Customer Support** (React, Node.js, Pinecone)

Jun 2024

- Engineered a production-ready e-commerce AI agent using DeepSeek, React, and Node.js to support customer service
- Integrated Pinecone vector DB (1536-dim embeddings) enabling semantic search and compatibility checks
- Built intelligent query preprocessing and multi-modal response generation, handling part/model number recognition, troubleshooting, and step-by-step installation guidance
- Delivered a fully functional prototype with <3s response latency, <2% error rate, and full mobile optimization within 48 hrs

**GAF Sales Intelligence Platform - AI Agent for B2B Sales Insights** (Python, FastAPI, Streamlit)

Jul 2024

- Designed and implemented a modular data pipeline to scrape, process, and enrich public contractor data
- Built a role-based web dashboard with interactive map visualizations and CSV export, enabling sales teams to prioritize leads and tailor outreach strategies
- Developed robust backend APIs and database models, ensuring scalable integration, efficient data retrieval

**Ekphrasis – AI Feedback Tool for Graphic Design Education** (Jupyter Notebook, HTML, Python)

Aug 2024 - Jan 2025

- Designed an AI-powered interactive tool offering visual feedback to help students understand abstract design concepts
- Conducted user research and thematic analysis with 11 educators to identify language barriers in design critique
- Developed an Interface and a machine learning model to generate contextualized visual examples based on students' work
- Improved learning outcomes for novice designers through real-time, visual, and context-aware design aids

## Skills

**Programming & Frameworks:** Python, JavaScript (TypeScript), React, Node.js, Flask, Express

**AI/ML & Data:** LLM APIs, Prompt Engineering, CLIP, Vector Databases (Pinecone, SQLite), Docker, Git

**Design & Prototyping:** Figma, Adobe Creative Suite, Interaction Design, User Research, Rhino
